Subject: FW: Eugene Weekly | Water for Warm Springs

Thought I would share this article that describes the challenges Peter Contreras/Adam Baron are dealing with on the Drinking Water side of the branch. You should also know the Ray Andrews has two WWTPs on the Warm Spring on his docket. There are two existing open AOCs with continued non-compliance. The NPDES side has been holding back given the public health issues on the PWS side and the capacity of the tribe to deal with one problem at a time. Some good news, Indian Health Service is apparently putting out for bid in the spring a 2.2 million dollar project to repair and update one of the systems under the AOC.

Ray can give you the deep briefing at some point if he hasn't already.
